

NOTICE TO MARINERS M58 of 2018

NINE ELMS REACH ALBERT EMBANKMENT COFFERDAM CONSTRUCTION WORKS

This notice supersedes M114 of 2017 which is hereby cancelled.

Mariners are advised that contractors working on the Tideway Tunnel Project will continue with works which will involve constructing a second cofferdam on the Albert Embankment South West of Lacks Dock. Works will also continue at the first cofferdam constructed under M114 of 2017.

Please see the chartlet below depicting the location of the construction works, placement of marine plant, and both cofferdams as completed.

No vessels other than those engaged in the works shall enter the navigation exclusion zone depicted by the red line on the chartlet.

The works which will include dredging, diving, piling and back filling operations will take place using a variety of barges including crane barges, jack up barges, supply barges, tugs and Multicat vessels and are expected to take approximately 7 months.

The vessels involved will maintain a continuous listening watch on VHF channel 14. At times RY flags will be exhibited in conjunction with "proceed with caution / slow down requests" in VTS broadcasts.

Vessels are requested to be mindful of the nature of the works, be aware of vessels proceeding to and from the works, their wash when passing the works, and to pass at a safe distance particularly from any yellow pellet buoys which may be marking anchors, sinkers or other under water obstructions.

Further details will be broadcast by London VTS on VHF Channel 14.
